A Checklist of the
—BIRDS—
 at Crow's Nest

Crow's Nest Natural Area Preserve
 2500 Brooke Road
 Stafford, Virginia 22554

Hours vary by season:
 March 15 – Oct. 31 • 8 a.m. – 8 p.m.
 Nov. 1 – March 14 • 8 a.m. – 5 p.m.

Crow's Nest was dedicated as Virginia's 54th natural area preserve in 2008. The diverse plant communities within the preserve provide important habitat for a variety of birds, including breeding birds, neo-tropical migrants and over-wintering waterfowl. Bird diversity peaks during fall and spring migrations when waves of neo-tropical migrants pass through Virginia.

The Accokeek Overlook Trail and the canoe launch boardwalk provide birders with access to the freshwater tidal marsh along Accokeek Creek, as well as the adjacent hardwood forest. In the future, an additional 8 miles of hiking trail will be available within the interior of the preserve.

This checklist identifies more than 160 species that have been seen within or from the shoreline of Crow's Nest. The list will be updated as more information becomes available. All additions, corrections and comments to the checklist should be sent to michael.lott@dcr.virginia.gov.

Birds known to breed at Crow's Nest are shown in **bold**. Many birds are migratory; therefore, their seasonal occurrence is coded as follows:

Seasonal occurrence

Sp	Spring	<i>March-May</i>
Su	Summer	<i>June-September</i>
F	Fall	<i>September-November</i>
W	Winter	<i>December-February</i>

Relative abundance

A	<i>abundant</i>	a species which is very numerous
C	<i>common</i>	likely to be seen or heard in suitable habitat
U	<i>uncommon</i>	present, but not certain to be seen
O	<i>occasional</i>	seen only a few times during a season
R	<i>rare</i>	may be present but not every year
